Education

Western Michigan University

Graduation: Dec 2020

Bachelors of Business Administration | Computer Information Systems

Work Experience

BizStream

May 2025 - August 2025

Web Development Intern

Allendale, MI

Tech Stack: C#, .NET, SQL, SASS, React, Next.js, Kentico, Storyblok, Git, Github Actions, Jest

- Boosted editorial efficiency by developing Storyblok (Next.js) and Kentico (.NET) solutions, reducing developer dependency for content updates.
- Increased deployment speed by and reduced release errors by implementing Jest tests for coverage and automating CI/CD pipeline with GitHub Actions.
- Strengthened team delivery by contributing in Agile/Scrum sprints, daily standups, and bi-weekly demos rotating between five different projects.

Kikcit

October 2024 - December 2024

Contract Software Developer

Grand Rapids, MI

Tech Stack: TypeScript, React, React Native, Expo, TailwindCSS, Firebase (Cloud Functions, Auth, Emulators, Firestore)

- Launched a successful beta release of the Kikcit mobile and web applications.
- Built ad management features for Kikcit's Partner Portal, enabling 20+ local businesses to promote events and deals directly in the app.

Deksia

September 2024 - December 2024

Web Development Intern

Grand Rapids, MI

Tech Stack: Wordpress, Elementor, AdobeXD, Hubspot, Zapier

- Automated client support ticket workflows using Zapier, Gmail, ChatGPT, and HubSpot - reducing manual task handling.
- Launched two clients Wordpress websites, improving load speed and boosting on-site engagement through optimized UX design.

Creative Mines

January 2022 - January 2023

Full Stack Software Developer

Hancock, MI

Tech Stack: TypeScript, React, Material-UI, Redux, AWS (Amplify, S3, Lambda Functions), Git/Github

- Delivered AWS Amplify serverless web app with passwordless email authentication via Amazon Cognito & SES, improving security and reducing login drop-offs.
- Enhanced SaaS cybersecurity platform (LogRhythm Axon) by building the "Policy Builder" feature with React/Material-UI, streamlining policy creation for enterprise clients.
- Collaborated with cross-functional teams in Agile workflows (daily standups, pair programming), accelerating delivery of new features.

Projects

Shine Time - [[Live Demo](#)] [[GitHub](#)]

February 2025 - May 2025

Tech Stack: TypeScript, Next.js, React, Square API, Mapbox, TailwindCSS

- Launched a production-ready auto detailing appointment booking platform with real-time availability, user confirmation emails, and admin scheduling tools.
- Integrated Square API for seamless appointment creation, tracking, and management—reducing manual booking overhead and leveraged Mapbox to enable precise, location-based service selection.

Mistore - [[GitHub](#)]

December 2023 - February 2024

Tech Stack: MongoDB, Express, React, Node.js, Redux, Stripe API, JWT Authentication

- Built a full-featured ecommerce platform with secure authentication, shopping cart functionality, and Stripe-powered checkout for seamless payment processing.
- Developed an admin dashboard to manage products, orders, and users, streamlining backend operations and providing real-time order tracking.
